Why use window film?

➤ Health

We love the sun! However, it is quite harmful to our skin ... not to mention the health of artwork, upholstery, hardwoods, and other valuables. Protect yourself and those around you. Even the lightest of window films can offer excellent UV protection.

➤ Climate Control/ Energy Efficiency

A quality window film keeps the heat out in the summer and adds insulation to your window in the winter. It's a perfect addition for all those who like a moderate and consistent climate year round (without suffering the costs of high energy bills)!

➤ Privacy

There is nothing better than having your blinds open or shades up, while still experiencing total privacy. Need we say more?

➤ Glare Reduction

Does the bright sun make it difficult to watch your TV, use your computer, or see the person next to you? Install a glare reducing window film and enhance your visibility while dampening bright spots within your interior design.

➤ Safety

A protective window film can offer safety against hurricanes & tropical storms, bomb blasts & break-ins, stray golf balls & baseballs, and more!

➤ Balance

Having the right window film can assist in creating a soothing and inviting atmosphere in the interior of your home or workplace. Open your blinds... enjoy the daylight... enhance your environment in the ancient tradition of ... Feng Shui.
